P R O J E C T S

E-Commerce Frontend Website

- This project is focused on developing a fully functional, high-performance frontend eCommerce website that includes categories for Men, Women, and Kids. Key functionalities include product listings, detailed product views, a shopping cart, user authentication, and a streamlined, responsive user interface. By utilizing modern web technologies like React.js and Styled-components, the project aims to enhance performance by 30%.

Portfolio Website with Contact Form

- This project aims to create a fully responsive portfolio website using HTML, CSS, and JavaScript. The website will showcase all my skills, detailed information about me, and provide a downloadable resume. It will include links to my social media profiles and feature a highly optimized contact form with a 40% extra smooth performance enhancement for seamless user interactions.
